

## E-Z LOK Thread Repair Inserts For Metal

**Issue:** Maintenance departments, machine shops, and injection molders require a strong, easy to use solution for repairing and reinforcing threaded holes in metal.

**Application:** E-Z LOK thread repair inserts for metal are screw machined out of solid carbon or stainless steel for greater strength. Standard size/pitch OD threads make installation as easy as threading in an ordinary fastener. The user simply drills and taps a hole with standard tools, then threads the E-Z LOK insert in with a screwdriver or bolt and jam nut. Preapplied Loctite adhesive locks the insert in place.

**Recommendation:** Grainger offers E-Z LOK thread repair inserts in sizes ranging from 4-40 to 1-8. Fine threads are available, as well as metric sizes from M3 to M20.

### Product Features & Benefits:

For more information about E-Z LOK thread repair inserts, contact your Grainger Representative, local branch, or go online to [grainger.com](http://grainger.com) and see the complete line of thread repair inserts.

<p><b>Solid Construction Design</b></p> <ul style="list-style-type: none"> <li>• Screwmachined out of solid steel for greater tensile strength</li> </ul>
<p><b>Standard OD Threads</b></p> <ul style="list-style-type: none"> <li>• Unlike ordinary coil thread repair inserts, E-Z LOKs feature standard OD threads which allow for the use of standard tools...no special drills, taps or installation tools required.</li> </ul>
<p><b>Install with a Screwdriver</b></p> <ul style="list-style-type: none"> <li>• E-Z LOKs thread into place like an ordinary fastener using a screwdriver or bolt/jam nut. Drive tools are available for higher volume applications.</li> </ul>
<p><b>Preapplied Adhesive</b></p> <ul style="list-style-type: none"> <li>• Locks the insert in place and seals against liquids and gases to 6000 psi.</li> </ul>
<p><b>Available In Stainless Steel</b></p> <ul style="list-style-type: none"> <li>• Ideal for food/dairy industries, as well as corrosive environments</li> </ul>
