

KMC Wire, Tube, Hose and Cable Clamps

Issue: Injury and failure can occur if wires, tubes, hoses, and cables interfere with moving parts, motors, and applications.

Application: Clamps should be used to secure wires, tubes, hoses, and cables in a safe and organized fashion for contractors, light manufacturing, and heavy manufacturing.

Recommendation: Grainger offers KMC Rubber Cushion and Vinyl Dipped Clamps. Each made from Hot-Dipped Galvanized steel, Chem treated G90 for superior corrosion protection. Stainless Steel is also available. These clamps perform in applications found in the HVAC, Automotive, Electrical, and other related industries.

PRODUCT FEATURES & BENEFITS:

For more information about KMC clamps, contact your Grainger Representative, local branch, or go online to grainger.com to place your order and see the complete line of wire, tube, hose, and cable clamps.

- **Hot-Dipped Galvanized, Chem Treated G90 Material**
- Prevents corrosion
- Protects internal components
- Per ASTM A653/A653M
- **Type 304 Annealed Stainless Steel**
- **Available with EPDM Rubber Cushion**
- Per SAE J200/ASTM D2000 BC715A14C12EO34
- Colored Black
- Temperature Range= -50 degrees to 350 degrees Fahrenheit
- Helps cut vibration
- **Available with Vinyl Plastisol Coating**
- Colored Black
- Temperature Range= -30 degrees to 300 degrees Fahrenheit
- **Available in multiple widths and hole dimensions**
- 0.281" Hole diameter fits 1/4" Screw
- 0.406" Hole diameter fits 3/8" Screw
- **Meets several automotive performance specs**

Productive Workplace

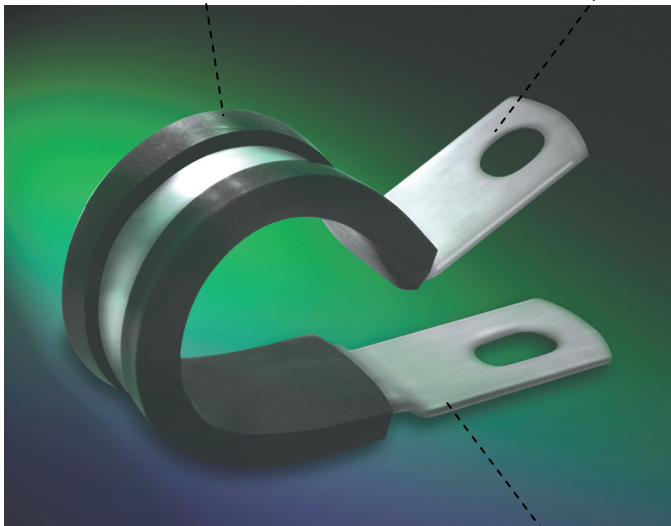

KMC Wire, Tube, Hose, and Cable Clamps

Product Features

EPDM Rubber Cushion

Hole diameters either:
0.281" for 1/4" Screw or
0.406" for 3/8" Screw

Vinyl Plastisol Dipped

HD Galvanized Steel, Chem Treated G90
Or 304 Stainless Steel

Clamping diameters ranging from 1/4" to 3" diameters or larger.
