

## Use one system for a variety of applications

**Issue:** The stages of prepping, processing, and finishing automotive parts can be time-consuming and tiresome. Manually grinding away surface impurities and smoothing rough automotive parts are tedious tasks that may result in decreased worker productivity.

**Application:** Increase worker productivity by using a complete system that allows you to grind, sand, and finish parts in a variety of automotive applications.

**Recommendation:** Grainger now offers the 3M™ Scotch-Brite™ Regalite™ Drill Mounted Automotive Grinding/Sanding/Finishing System to make your automotive applications more productive. This convenient system includes one 2" disc holder, three 2" 3M™ Regalite™ Sanding Discs, and two 2" Scotch-Brite™ Discs. An easy twist-on attachment system allows for quick, interchangeable disc options. Compatible with electric and air drills, this system will help streamline a variety of maintenance and repair operations.

# 3M

### 3M™ Scotch-Brite™ Regalite™ Drill Mounted Automotive Grinding/Sanding/Finishing System
