

Dixie® Compostable Disposable Products

Issue: Companies and Employees are interested in products with a high quality trusted brand that also have “green” attributes.

Application: All Dixie paper based products can be processed successfully through commercial-scale composting operations – wax coated cups, cold cups, standard hot cups, PerfectTouch, Insulair, plates, and bowls.

Recommendation: Grainger offers a variety of high quality Dixie paper based products with excellent environmental benefits.

Product Features & Benefits:

Dixie paper and plastic foodservice products are recyclable through commercial recycling centers with the ability to accept food-contaminated waste. Most Dixie products are made from renewable raw materials and others minimize raw material use. We continually review our processes to minimize raw materials use and ensure that our products are manufactured efficiently with as little waste as possible.

Dixie Paper Plates and Bowl

- Made from 90% renewable materials and 9% natural resources
- Compostable*
- Grainger SKUs: 1JYY9, 1JYX9, 1UCU7, 1JYY1, 4KMX2 and 4KMX3

Dixie Paper Cups

- **Hot cups** are made from 90% renewable materials
 - Grainger SKUs: 1PTK7 and 1PTL3
- **Water cups** are made from 70-90% renewable materials
 - Grainger SKU: 1PTK2
- **PerfectTouch® cups** are made from 85% renewable materials
 - Grainger SKUs: 1PTW4m, 1PTU6, 1PTR3, 1PTR8 and 4KMX7
- **Cold cups** are made from 85% renewable materials
 - Grainger SKUs: 1UCU3 and 1UCU3
- **Insulair EcoSmart cups** use a minimum of 12% post-consumer recycled fiber
- Compostable*
- Grainger SKUs: 2ERU2, 2ERU3

Dixie Plastic Products

- Manufactured with minimal waste and very high resin efficiency (only 2% or less petroleum-based plastic not used when product made)

* **Compostable Definition:** A type of biodegradation. Materials that are able to be composted or biodegradable in warm, moist conditions with oxygen and bacteria over periods of several weeks to several months.

Dixie® Compostable Disposable Products
