

Environmentally Responsible

Partner with Grainger to Help Conserve Water and Save Money

Issue: Only 0.3% of the world's water supply is available for the population to share for agricultural, residential, manufacturing, community and personal needs. While the supply of water remains constant, the demand for fresh water continues to increase. Source: IFMA Foundation

Application: Taking measures to conserve water can reduce water and sewer costs by up to 30%. You can also save on energy costs by using less energy to heat, pump and treat water. Using less water also helps save on sewer service costs. Source: www.GreenBiz.com

Recommendation: Trust Grainger to provide products that make water saving easy and are designed to cut water consumption.

Water Saving Products:

No. 2LYG5

Electronic Metering Faucet

- Sensor range 1-12 inches
- Includes mixing valve
- Flow rate 0.5 GPM
- ADA compliant

CHICAGO FAUCETS
 a Geberit company

No. 4FB38

Waterfree Urinal

- Conserves up to 40,000 gallons of water per unit per year
- Sealed cartridge eliminates the need for water
- Water supply lines-reduces maintenance and costs
- Touch-free operation

SLOAN

No. 2XU40

Dual Flush Valve

- Valves convert existing flushometers to water-conserving units
- Allow full or partial flushes
- Includes 2 plaques that tell users how to operate valve
- Handle has antimicrobial coating

SLOAN

No. 1YHY9

Flush Valve Toilet

- Wall mounted low-flow toilet
- Elongated bowl
- 1.28 GPF
- ADA, ANSI/ASME compliant

American Standard
