

# Occupational Health and Safety Value-Added Education

Grainger can help you improve safety through our comprehensive product offering. We'll bring in our key suppliers to provide **FREE** technical expertise.

Topic	Supplier	Estimated Savings
<b>Arc Flash Awareness Seminar:</b> Designed to bring awareness to the NFPA 70E Standard. Additional topics reviewed are methods of assessment, PPE equipment, proper electrical tools, and test instruments, and labeling for the hazards.	Salisbury, Square D, Fluke and Brady (any or all of these)	\$500/seminar
<b>Breathing Air Quality Testing:</b> Provides an air sampling test kit for the customer to sample his low or high pressure air used for breathing. Customer sends off air samples and receives a report in 5-7 days from the lab providing a certified laboratory report of the customer's Grade D or Grade E air quality. Once completed, the customer returns the test kit to Air Systems International.	Air Systems International	\$50/week for sample kit rental \$125/sample for lab testing
<b>Breathing Air Equipment Training:</b> Provide a specific CD training video based on the customer's specific application of Air Systems' product.	Air Systems International	\$250/training
<b>Coating &amp; Anti-Slip Solutions:</b> An evaluation based on application, hazard concerns and safety color-coded paint requirements.	Rust-Oleum	\$300/survey
<b>Climbing and Access Solutions – Work Platforms and Ladders:</b> Design, engineer and manufacture application and environment specific product solutions that address productivity, safety, ergonomics, and code compliance. On-site evaluations conducted on an as needed basis.	Tri-Arc	\$500/session
<b>Confined Space Analysis:</b> Conduct plant tour to determine potential confined space hazards.	MSA, Sperian Instrumentation, Miller by Sperian, Capital Safety, Industrial Scientific	\$500
<b>Electrical Safety:</b> Facility analysis of potential electrical safety issues and recommend appropriate electrical product solutions.	Hubbell	\$100/hour
<b>Emergency Eyewash &amp; Drench Shower Facility Surveys:</b> Customer confidential evaluations of their facility for emergency eyewash and drench shower safety. The walk-through includes ANSI-compliance recommendations on products and strategies to keep the customer's workplace safe and OSHA compliant.	The Bradley Corporation	\$1,000/survey
<b>Emergency Eyewash Station Analysis:</b> An evaluation designed to assist the customer with regulatory compliance of the proper operation and locations of eyewash stations.	Sperian	\$500/survey
<b>Ergonomic Matting:</b> Evaluate your facility to recommend the right anti-fatigue matting that will reduce back and lower leg fatigue for employees who stand while working. Recommend the proper mat that will hold up in areas with oils or chemicals, as well as provide 12" samples for you to stand on, or to test against chemicals.	Notrax Floor Matting	\$300/assessment

Topic	Supplier	Estimated Savings
<b>Ergonomics Support:</b> Conduct a site assessment for customers and recommend the appropriate ergonomics products.	Southworth Products	\$500/assessment
<b>Eye, Face &amp; Head Protection:</b> Assist you with your workplace hazard assessments, qualifying the specific product solution. Samples are provided allowing users to check proper fit and application.	MSA, Aearo, Sperian, North Safety	\$500/assessment
<b>Fall Protection:</b> Conduct plant/site survey to identify potential fall protection hazards and suggest products or programs to minimize risk. Training through a mobile demonstration vehicle that demonstrates arresting forces workers would experience during a fall. Training can also include the types of fall protection equipment and proper inspection and/or ANSI standard and OSHA regulations.	Miller by Sperian, Capital Safety/DBI	\$750/session
<b>Fire Stop Training Program:</b> Educates users on general firestopping information and provides supplier specific training on UL classified systems.	3M, STI	\$500/session
<b>First Aid:</b> Assist customers with establishing a first aid program, understanding regulations, and meeting ANSI fill requirements.	North Safety	\$500/assessment
<b>Food Processing Hand Hygiene Training:</b> Teach employees proper hand hygiene in order to maintain high quality and limit cross contamination. Includes language neutral DVD, visual clues and trainer's guide.	GoJo	\$400/session
<b>Gas Detection:</b> Training on how to use gas detection products, including calibrating the equipment.	MSA, Sperian Instrumentation, Industrial Scientific	\$500/session
<b>Hand Hygiene Needs Analysis:</b> An evaluation of a facility's skin risks, irritants, and worker behavior in order to determine their impact on an effective hand hygiene regimen.	GoJo	\$250/ needs analysis
<b>Hand Protection &amp; Glove Analysis:</b> An evaluation of the glove program to determine proper selection and use, as well as identify cost savings. Samples are also provided, allowing users to ensure proper fit and application.	Best, Ansell, Sperian, North Safety	\$25/person
<b>Hazardous/Flammable Liquid Handling &amp; Storage:</b> Audit of hazardous/flammable storage, use and handling.	Justrite STUDE, Eagle CLAWS	\$500/audit
<b>Hearing Conservation:</b> Training program designed to assist the customer in becoming compliant with the OSHA Standard 29CFR1910.95 as well as instruction on the importance of proper use of hearing protection devices.	EAR, Howard Leight by Sperian, 3M	\$300/session
<b>Heat Stress Prevention:</b> Onsite evaluation to determine heat stress risks allowing for product evaluation and testing.	North Safety, Sqwincher	\$500/session
<b>Hydraulic Tool Safety:</b> Seminars designed to promote the safe use and application of high force hydraulic tools and equipment providing a site survey, tool crib audit and recommendations for selecting the right product for the application.	Enerpac	\$1,000/session
<b>Knife Safety:</b> Safety training covering self-retracting knives, safety blades, case cutters and blade disposal containers. Includes safety awareness posters and educational DVD/videos.	OLFA	\$100

Topic	Supplier	Estimated Savings
<b>Ladder Training Kit:</b> Werner Climbing Pro Ladder Safety Kit with training video and literature provides training on safe and proper ladder use, how to select the correct ladders for the job, and ladder inspection. Includes a quiz to reinforce learning. <i>(Sellers, please order 8S1241 Ladder Safety Kit)</i>	Werner Ladder	\$100
<b>Matting Assessment:</b> Survey facility to recommend the right anti-slip matting to help prevent slips and falls in slippery areas within your facility. Recommend the proper mat that will hold up in areas with oils or chemicals as well as provide 12" samples for testing.	Notrax Floor Matting	\$300/assessment
<b>Motor Safety:</b> Provide training on the selection and installation of motors.	Ametek Lamb, AO Smith	\$100/session
<b>Multimeter Assessment:</b> Programs designed to emphasize use and application of multimeters, inspection of equipment and other safety procedures.	Fluke	\$250/session
<b>Pandemic Planning:</b> Provides all-hazard emergency response support by helping customers to plan and prepare for a disruptive event, to protect their workers and recover their operations, and to reinforce and update their knowledge with meaningful information that improves their readiness levels and disaster management programs.	3M	\$500/seminar
<b>Power &amp; Hand Tool Safety:</b> Seminars designed to promote proper ergonomic use and safety practices for hand and power tools as well as recommending the most efficient tool for the application to increase productivity.	DeWalt, Milwaukee, Stanley-Proto, Cooper Hand Tools, Irwin	\$300/session
<b>Respiratory Protection:</b> Conduct training and fit testing. Assist with program development to meet OSHA standards.	3M, MSA, Sperian, North Safety	\$25-\$50/person (excludes medical evaluation)
<b>Safety Paint Assessment:</b> Conduct a site survey to determine the condition and location of your safety markings and recommend the proper safety coatings.	Rust-Oleum	\$300/assessment
<b>Slip, Trip and Fall Prevention:</b> Provide a pedestrian safety site assessment that takes in customer facility observations and gives back recommended products and solutions in order to help the facility become safer, not only for employees, but for customers as well.	Brady, Rubbermaid, Rust-Oleum	\$500/assessment
