

Help prevent construction site theft with security products and monitoring systems.

Issue: Construction site theft is estimated by The National Association of Home Builders to cost the building industry \$4 billion annually.* Stolen items can include everything from tools and material to heavy equipment. The majority of stolen items are not recovered resulting in lost production time and profits.

Application: Utilize mechanical and electronic security products with monitoring systems to help keep your jobsite safe.

Recommendation: Grainger offers locks with a hardened steel body and shackle to withstand physical attacks and defy bolt cutters, or choose a laminated steel padlock or adjustable locking cables. A Closed Circuit Television System not only aids in the detection of jobsite theft, it can also detect motion, prompting an alarm to intruders.

High Security Commercial Padlock
No. 4T082

Hidden Shackle Lock
No. 1JAD9

Hasp
No. 1JAE4

Adjustable Locking Cable
No. 3NY54

High Security Chain
No. 1JAF5

Waterproof Bullet Camera
No. 6LU70

Dome Camera No. 6LU72

Digital Video Recorder
No. 1ZMD4

LCD Flat Panel Monitor
No. 6LU90
