Quartet® Laser Pointers
Get to the point. Deliver presentations with exacting precision.
**Quartet® Red Laser Pointers**

**Contour Comfort Laser Pointers**
Contoured Class 3a laser pointer with rubberized cushion grip delivers exceptional comfort and style. Lightweight, durable construction and pocket clip promise ease-of-use. Designed for large venues and can be used on any medium.

**Slimline Laser Pointer**
Ultra lightweight design is easy to use and portable. Compact size Class 2 laser pointer is convenient for everyday use. Designed for small venues and can be used on any medium.

**Stylus Deluxe Laser Pointer**
Pen-style Class 3a laser provides a bright red laser dot on any medium, visible in all room conditions. Ideal for basic everyday use.

**Black Metal Laser Pointer**
Pen-style Class 3a laser provides a bright red laser dot on any medium, visible in all room conditions. Ideal for basic everyday use.

**Comfort Grip Laser Pointer**
Perfect for the boardroom and the back room. This rugged, comfortable laser pointer features a rubberized cushion grip. Class 2 version can be used in many restricted governmental and education installations.

**Classic Comfort Laser Pointer**
Pen-style Class 3a laser pointer with rubberized cushion grip delivers exceptional comfort and style. Lightweight, durable construction.

**Standard Laser Pointer**
Pen-style Class 3a laser provides a bright red laser dot on any medium, visible in all room conditions. Ideal for basic everyday use.

**Mini Key Chain Laser Pointer**
Store these economical, compact pointers in your attaché, handbag or pocket. This Class 3a key chain pointer is convenient for basic everyday use. The most compact laser pointer offered by Quartet.
Wireless Remote and Laser Pointer
Ideal for delivering dynamic presentations. Class 2 laser pointer with removable USB receiver. Page up and down buttons allow for movement through presentations without retuning to the computer.

Wireless Mouse and Laser Pointer
Red dot laser pointer with full remote mouse functionality. Class 2 laser pointer with page up/page down function for PowerPoint. Open Microsoft Outlook®, your internet Browser, My Computer, show desktop or tab from application to application all with the touch of a button.

4-in-1 Laser Pointer
Four functions in one – laser pointer, PDA stylus, LED light and ball point pen. Versatile, multi-functional Class 2 laser pointer lets you deliver your point in style. Durable, all metal pointer is held in a sleek, compact body.

Chrome Pocket Pointer
Classic chrome pointer in a slim line pen size. Convenient for basic everyday use. Extends out to 24.5”. Classic styling with chrome finish and pocket clip.
Quartet® Green Laser Pointers

Bright.
Powerful.
Accurate.

Brilliant Green Laser Pointer with Wireless Remote
Brilliant green laser is visible on all media, including large LCD monitors. High visibility Class 3a GREEN laser is 7 times brighter than a standard red laser pointer. Features buttons for Next and Previous, making presentation navigation quick and easy. No additional software needed. PC and Mac compatible.

Brilliant Green Laser Pointer
Best tool for highlighting key information when presenting with an ultra bright projector. High visibility Class 2 GREEN laser is 7 times brighter than a standard red laser pointer. Ideal for use with high brightness LCD screens. Based on a pen style for convenient use and storage.

Laser Pointer Information

A laser pointer is a small portable device with a power source and a laser diode. A laser pointer emits a very narrow low-powered laser beam of light. The small beam width makes the beam itself virtually invisible; only showing a point of light when meeting an opaque surface.

Choosing Your Laser Pointer Light Color

Green
Far brighter than red lasers, green laser beams can be visible for thousands of feet in optimal conditions making them more than capable of handling meeting-room pointing jobs. Green laser light seems brighter than other colors because the human eye is most sensitive at low light levels in the green region of the spectrum (wavelength 520–570 nm). Green laser pointers are ideal for use during presentations which require the use of projection screens and monitors, bright lighting, or rear projection.

Red
The most obvious difference between green and red laser pointers is beam visibility. The human eye perceives green laser light to be roughly 50 times brighter than red lasers and red lasers lack the power and distance of green lasers.

The other main difference between red and green lasers is the complexity of their construction. Red lasers are the simplest pointers, smaller and generally much more affordable than lasers of other colors. Red lasers make an effective presentation tool and are commonly used throughout schools and offices.

Laser Classes

Class 2:
<1 mW Power; approved for most classroom and office use. A Class 2 laser is safe because the blink reflex limits the exposure to no more than 0.25 seconds. It only applies to visible-light lasers (400–700 nm). Class-2 lasers are limited to 1 mW continuous wave. Intentional suppression of the blink reflex could lead to eye injury.

Class 3a:
<5mW Power; general purpose pointer. Lasers in this class are considered safe when handled carefully. Beam power density may not exceed 2.5 mW/square cm if the device is not labeled with a “caution” warning label, otherwise a “danger” warning label is required.
