NQ, NF, I-Line, and QMB Panelboard Products
Reliable, Versatile, and Convenient Solutions
Developed with extensive input from electrical contractors, Square D™ panelboards are built to last, easy to install, and are designed for optimum space and labor savings. Supported by the largest distribution, sales, and service organization in the industry, Square D panelboards are readily available to meet the needs of contractors, consultants, and end-users.

The NQ Lighting panelboards are designed to meet the evolving needs of customers with electrical lighting and distribution applications. The innovative designs increase the availability and adaptability of these panelboards by offering complete ready-to-install kits.

NQ Lighting Panelboards
240 Vac Maximum

NQ panelboards meet 240 Vac applications and accept both the QO plug-on and QOB bolt-on circuit breakers.

Available Interiors
- 3P4W and 1P3W available
- Maximum 600 A Main Breaker or Main Lug available
- 18, 30, 42, 54, 72, and 84 circuits
- Main breaker or main lugs
- 10,000, 22,000, and 65,000 fully rated branches at 208Y/120 Vac
- Series ratings to 200,000 A at 208Y/120 Vac

Available Enclosures
Types
- Type 1 (Indoor)
- Type 2 (Driphood)
- Type 3R (Outdoor, Rain, and Sleet protection)
- Type 4/4X (Stainless, corrosion protection)
- Type 5 (Settling dust and dripping liquids protection)
- Type 12 (Circulating dust and dripping liquids protection)

Trims
- Surface and flush non-vented Mono-Flat™ trims for 250 A and below
- Surface and flush screwed-to-box vented for 400 A and above
- Hinged trim available; meets door-in-door specs
- Separate trim not required for Type 3R, 4, 4X, 5, and 12 enclosures

Available Options
- Copper bussing, copper lugs, copper neutrals
- Copper and aluminum, mechanical and crimp lugs
- Rail and dead front extension kits providing space only for future addition of ready-to-install kits (extensions of 6”, 12”, and 18” available)
- Increased side gutters 3”, 6”, and 12”
- Split bus
- Contactors
- Equipment space
- Locks (most common brands)
- In-line surge suppression
- Sub-feed lugs*
- Sub-feed breakers*
- Feed-through lugs*
- 200% neutrals*

* Field-installable
NF Lighting Panelboards
600Y/347 Vac Maximum

The NF panelboard offers superior performance and application flexibility for commercial and industrial electrical systems up to 600Y/347 Vac. This versatile lighting and power distribution panelboard features a wide selection of circuit breakers, accessories, and ready-to-install kits, as well as 200% rated neutrals for non-linear loads.

Available Interiors
- 3P4W and 1P3W available
- Maximum 800 A Main Breaker or Main Lug available
- 18, 30, 42, 54, 66, and 84 circuits
- Main breaker (600 A) or main lug (800 A)
- Fully rated branches:
  - 480Y/277 Vac: 18,000 A, 35,000 A, and 65,000 A
  - 600Y/347 Vac: 14,000 A, 18,000 A, and 35,000 A

Available Enclosures
Types
- Type 1 (Indoor)
- Type 2 (Driphood)
- Type 3R (Outdoor, rain and sleet protection)
- Type 4/4X (Stainless, corrosion protection)
- Type 5 (Settling dust and dripping liquids protection)
- Type 12 (Circulating dust and dripping liquids protection)

Trims
- Surface and flush non-vented
- Mono-Flat trims for 250 A and below
- Surface and flush screwed-to-box vented for 400 A and above
- Hinged trim available; meets door-in-door specs
- Separate trim not required for Type 3R, 4, 4X, 5, and 12 enclosures

Series Ratings
- 480Y/277 Vac: 200,000 A maximum
- 600Y/347 Vac: 200,000 A maximum

Available Options
- Copper bussing, copper lugs, copper neutrals
- Copper and aluminum, mechanical and crimp lugs
- Rail and dead front extension kits provide space only for future addition of ready-to-install kits (extensions of 6”, 12”, and 18” available)
- Increased side gutters 3”, 6”, and 12”

* Field-installable

NF panelboards offer application flexibility for commercial and industrial electrical systems up to 600Y/347 Vac.
I-Line Combo Panelboards
600Y/347 Vac Maximum

The new Square D I-Line™ Combo Panelboard will change the way you install panelboards. Its simple, flexible, and innovative design uses a smaller footprint and delivers significant savings on installation time, labor expenses, and materials costs.

Available Interiors:
> 3P4W, 3P3W, 1P3W, and 1P2W available
> 1,200 A main circuit breakers or 800 A main lugs
> Single or Duplex configurations available
  > 18” or 22.5” of I-Line mounting space; up to 54 available lighting circuits
  > 22.5” or 31.5” of I-Line mounting space; up to 84 lighting circuits
  > 22.5” or 31.5” of I-Line mounting space; up to 54 lighting circuits and optional mounting space for customizable assemblies
> Fully rated and series rated systems available

Available Enclosures
Types
> Type 1 (Indoor)
> Type 2 (Driphood)
> Type 3R (Outdoor, Rain, and Sleet protection)
> Type 4/4X (Stainless, Corrosion protection)
> Type 5 (Settling dust and dripping liquids protection)
> Type 12 (Circulating dust and dripping liquids protection)
Trims
> Standard trims available (door not included)
> Four-piece Surface or Flush construction
> Optional four-piece trim with door

Accessories
> Plated copper or aluminum bus
> 6”, 9”, or 12” box extensions
> 14” side car enclosures
> Optional 200% rated neutrals through 1,200 A
> Communication capabilities available with use of PowerPact™ with Micrologic™ Trip Unit circuit breakers

Available Options
The I-Line Combo Duplex Panelboard, with optional mounting space, provides the capability for future site growth.

Ready-to-Install Kits
> Dual 18-circuit section assembly
> Single 18-circuit section with contactor mounting assembly
> Additional 42-circuit section assembly
> Contactor mounting kit for up to three contactors

Factory Assembled Options*
> Powerlink™ lighting section in 42 or 54 circuit configurations

*Options listed above for ready-to-install configurations can be ordered as cable fed factory assembled configurations.

A wide variety of customizable assemblies are available for field or factory installation.
The I-Line power distribution panelboard is the most versatile on the market and features the Schneider Electric™ unique breaker engagement system. It is used to feed NQ and NF lighting and appliance panelboards and is capable of feeding large motor loads. Wherever electricity is distributed or controlled, you’ll find I-Line Power Panelboards.

**Available Interiors:**
- 3P4W, 3P3W, 1P3W, and 1P2W available
- 1,200 A main circuit breaker or main lugs
- Up to 108 inches of I-Line circuit breaker mounting space
- Fully rated and series rated systems available

**Available Enclosures**

*Types*
- Type 1 (Indoor)
- Type 2 (Driphood)
- Type 3R (Outdoor, Rain, and Sleet protection)
- Type 4/4X (Stainless, Corrosion protection)
- Type 5 (Settling dust and dripping liquids protection)
- Type 12 (Circulating dust and dripping liquids protection)

*Trims*
- Standard trims available (door not included)
- Four-piece Surface or Flush construction
- Optional four-piece trim with door

**Available Options**

A wide variety of accessories are available for field or factory installation of I-Line power panelboards.

- Plated copper or aluminum bus
- Sub-feed or through-feed lugs through 1,200 A
- 6", 9" or 12" box extensions
- Split bus bar
- Optional 200% rated neutrals through 1,200 A
- Optional customer metering with PowerLogic™ power meters or circuit monitors
- 100,000 A to 240,000 A plug-on SPD modules
- Six circuit QO 240 V plug-in distribution module
- Ground fault protection available on main or branch circuit breakers

The industry exclusive I-Line stacked bus structure was designed with the installer in mind ensuring simple and quick breaker installation.
When specifications or electrical codes call for a fusible panelboard, the QMB family offers unbeatable performance and time-saving installation features. The QMB power distribution panelboard feeds motors, transformers, and lighting systems.

**Available Interiors:**
- 600 Vac, 250 Vdc maximum
- Maximum main lugs 1,200 A
- Maximum main switch 800 A
- Fusible switches are rated for 200 K RMS symmetrical amperes with appropriate Class J, L, R, or T fuses installed
- Branch devices include 30 A – 800 A fusible switches, 15 A – 400 A circuit breakers

**Available Enclosures**

**Types**
- Type 1 (Indoor)
- Type 3R (Outdoor, Rain, and Sleet protection)

**Trims**
- Four-piece, surface
