HEAVY-DUTY GRADE 1 KEY-IN-KNOB LOCKSET

5400 SERIES

An ASSA ABLOY Group brand
INTRODUCTION

When demanding the highest standard of product performance in even the toughest industrial applications, look no further than the Yale® 5400 Series Heavy-Duty Grade 1 cylindrical locksets.

Yale's high-quality key-in-knob locksets have withstood the test of time by offering the finest cylindrical lock mechanisms available. Even today, 5400 Series locksets are assembled with superbly engineered components and constructed with high-grade materials for long-lasting reliability.

Manufactured for the industrial, commercial and institutional markets, 5400 Series locksets feature security, dependability and versatility in attractive designs and finishes that fulfill all decorative requirements and blend with any architectural décor.

UNDERWRITERS LABORATORIES (U.L.)

Yale 5400 Series locksets have been listed by Underwriters Laboratories, Inc. for use on fire doors having a rating up to and including 3 hours. These locksets are available with 1/2" (13mm), 5/8" (16mm), or 3/4" (19mm) throw latchbolts for use in all classes of locations when applied to hollow-metal, metal-clad (Kalamein) composite (with steel and other coverings) and wood-type fire doors.

In general these locksets with 1/2" (25mm) throw latchbolts are intended for use on single-swing doors not exceeding 4 feet in width and 8 feet in height. Locksets with 1/2" (25mm), 5/8" (16mm), or 3/4" (19mm) throw latchbolt are intended for use on the active leaf of a pair of doors not exceeding 8 feet (2.44m) in either dimension.

It is advisable to check local code authorities, the “Building Material Directory” published by UL, and the door manufacturer for specific hardware requirements. Underwriters Laboratories does not list locks with rabbeted fronts or hold-back feature on the latchbolt.

AMERICAN NATIONAL STANDARD INSTITUTE (ANSI)

ANSI A115 Specifications for Door and Frame Preparation
5400 Series Locksets conform to ANSI specification A115.2, which covers hollow metal doors and frames for cylindrical locks.

ANSI A156.2 Standards for Cylindrical Locksets and Latches
5400 Series Locksets conform to ANSI specification A156.2, Series 4000, Grade 1.

Split Finishes: When locksets with different trim finishes on each side are required, specify outside finish first and suffix by inside trim. Example, LF5401 x 605 x 625. The front and strike are finished to match inside trim unless otherwise specified.
## Quality Construction

5400 Lockset
- Constructed of heavy-gauge cold-rolled steel
- All parts zinc plated and dichromated for maximum corrosion resistance
- Recommended for use under normal climactic and environmental conditions

## Case

2-1/16" (52mm) diameter. All functions furnished in one standard size lock case.

## Latchbolt

1/2" (13mm) throw, deadlocking or plain, supplied standard. Optional 5/8" (16mm) and 3/4" (19mm) throw, deadlocking or plain, available to order. All latch units are interchangeable.

## Installation

Uniform, regardless of function or trim style. The latch unit requires a 1" (25mm) hole in edge of door and the lockset requires 2-1/8" (54mm) hole through the door.

## Reversibility

For either right or left-hand doors swinging in or out.

## Door Thickness

Adjustable for doors 1-3/8" (35mm) to 2" (51mm). Can be supplied by special order for doors over 2" (51mm) up to 2-1/4" (57mm) by using special roses. These roses are limited to certain designs and must be specified on the order if other than standard 1-3/8" (35mm) to 2" (51mm) thickness.
## GUARD BOLT
Deadlocks the latchbolt of locking functions to resist attempts to slip the latchbolt with a thin piece of material like a plastic credit card.

## STRIKE
1-1/4" (32mm) curved lip with wrought box supplied standard. Optional 1" (25mm), 1-1/2" (38mm), 1-3/4" (44mm) and 2" (51mm) curved lips with wrought boxes available to order.

## KNOBS
Selection of 3 knob designs fulfills most decorative requirements. All knobs are forged and reinforced or solid.

## FRONT PLATE
Wrought brass, bronze or stainless steel. Standard bevel 1/8" in 2". Flat or rabbeted to order. Note: Latch front must be flush with door edge.

## SCREWS FOR FRONT
Phillips flat head No. 8-8-32 x 3/4" (19mm) combo screw, for both wood and metal doors.

## SCREWS FOR STRIKES
Screws for Strikes: Phillips flat head No. 8-8-32 x 3/4" (19mm) [except, 497 and 497B which require Phillips flat head No. 12-12-24 x 1" (25mm) combo screw for both wood and metal frames].

## LEAD-SHIELDED LOCKSETS
These are intended to reduce emission of harmful rays through the door. Two 1/8" thick lead backup washers under each rose are furnished. Lead plug inserts are supplied in the knob spindles where lockset function permits. For maximum protection, plain knob operation is recommended on at least one side and preferably on both sides. To order, specify “Lead Shielded.”

## BACKSET
2-3/4" (70mm) standard. 3-3/4" (95mm), extension links for 5" (127mm), 6" (152mm), 7" (178mm), 8" (203mm), 18" (457mm), 19" (483mm), and up to 42" (1.06m) backset are available.
CYLINDER OPTIONS

For those applications requiring patented key control, Yale’s KeyMark® line of patented keyway cylinders provides the ultimate protection against unauthorized key duplication. Yale KeyMark’s utility-patented Security Leg® keyway features increased resistance against picking and impressioning and can easily retrofit into existing systems. For further details and availability, refer to the separate Yale KeyMark catalog.

SECURITY CYLINDERS

The patented Yale® Security Cylinder (Patent No. 4638651) contains two independent locking mechanisms. The first is a traditional 6 or 7-pin tumbler mechanism with spool drivers for greatly increased picking resistance.

The second is an innovative 5-tumbler rotating disc mechanism with sidebar engagement. The rotating discs are spring loaded and block the bottom of the keyway.

# Lockset Functions

<table>
<thead>
<tr>
<th>Model</th>
<th>Features</th>
</tr>
</thead>
</table>
| **5401 F75** | Passage or Closet Latch  
• For doors that do not require locking.  
• Either knob operates latchbolt at all times. |
| **5402 F76** | Privacy Bedroom or Bath Lock  
• For lavatory or other privacy doors.  
• Either knob operates latchbolt unless outside knob is locked by push-button inside.  
• Button automatically released when inside knob is turned or door is closed.  
• A coin inserted and turned in emergency slot will unlock door from outside.  
• Inside knob always active. |
| **5405 F86** | Storeroom or Closet Lock  
• For use on storeroom, utility, exit doors.  
• Deadlocking latchbolt.  
• Latchbolt operated by knob inside, key in outside knob.  
• Outside knob always rigid.  
• Inside knob always active. |
| **5406 F92** | Service Station Lock  
• Deadlocking latchbolt.  
• Either knob operates latchbolt.  
• Push-button locks outside knob.  
• Push-button automatically releases when inside knob is turned, door is closed, or key is rotated in outside knob (except when slotted push-button is rotated 90° clockwise to retain outside knob in lock position).  
• Lock opened by key in outside knob, inside knob always active. |
| **5407 F109** | Entrance, Storeroom or Corridor Lock  
• For entrance, general home or office doors.  
• Deadlocking latchbolt.  
• Either knob operates latchbolt (except when outside knob is locked from inside).  
• Pushing turn button in inside knob locks outside knob (automatically releases when inside knob is turned or key is rotated in locked outside knob).  
• Outside knob may be retained in locked position by pushing and rotating turn button 90° clockwise to a horizontal position; not released until turn button is manually returned to the vertical position.  
• Latchbolt is operated by key in outside knob or by rotating inside knob.  
• Inside knob always active. |
| **5408 F84** | Classroom Lock  
• For classroom or utility room doors.  
• Deadlocking latchbolt.  
• Either knob operates latchbolt (except when outside knob is locked by key).  
• Inside knob is always active.  
• Key releases outside knob. |

Yale® N 1821
Yale® N 1822
Yale® N 1823
Yale® 5400 locksets are supplied with a standard strike or a variety of optional strikes. All strikes are located on the same vertical and horizontal center lines as the latchbolt. Some strikes are available in special lip lengths to accommodate varying thickness of doors and frames. To determine the proper length of the lip, measure from the center line of the strike to the edge of the jamb, accounting for any interfering trim (i.e. wood molding) and then add 1/4" (6mm) for curved lip. **All strikes are reversible.** Strikes are fabricated of either brass, bronze or stainless steel, depending on the lockset trim finish. **When ordering strikes separately, specify the finish required.**

**List No. 497 Standard Strike**  
Strike for door and frames with ANSI A115.2 preparations.  
Available to special order.

**List No. 495 Optional Strike**  
Installed in frame with standard ANSI A115.2 preparation to cover the preparation when a lockset is not installed in the door.

**List No. 495-1/2 Standard Rabbeted Strike**  
1/2" x 1-1/4" (32mm) lip supplied standard with all 5400/5500 locksets when ordered with rabbeted latchbolts.

Attaching screws (not regularly supplied when strike ordered separately).  
For List Nos. 495, 495M, 495-1/2" (13mm) and 431 strikes - #8-8-32 x 3/4" (19mm) Phillips flat head combination wood and machine screw P/N-81-201209416  
For List No. 497 Strikes and 497B Plate - #12-12-24 x 1" (25mm) Phillips flat head combination wood and machine screw P/N-81-2012-0620.

Note: When ordering strike plates or attaching screws individually, specify the finish required; i.e. 497 202, 612; #81-2012-0620 x 612.

**PACKAGING**

Yale 5400 Series locksets are completely assembled at the factory. Each box has a strike, paper template, combination wood and machine screws and easy-to-follow instructions. Cylinder functions are supplied with two keys and furnished right hand unless otherwise specified. Each case contains spanner wrenches for use in installing locksets. There are ten unit cartons to a master carton or case.

**SAMPLE SPECIFICATION**

All locksets shall be 5400 Series Grade 1 Key-in-Knob cylindrical locksets as manufactured by Yale Commercial Locks and Hardware.

Lockset mechanisms are to be constructed of heavy-gauge cold-rolled steel, zinc dichromated plated to protect against rust and corrosion. Locksets shall be adjustable to fit doors between 1-3/8” (35mm) to 2” (51mm) thick.

Locksets shall be available either with lock and trim made entirely of stainless steel (except cylinders) or lockset mechanism is constructed of stainless steel as listed above, knobs are steel zinc plated with dichromated liners and shanks, roses are brass or bronze supplied with stainless steel liners. Locksets shall be reversible for either right hand or left hand doors and be easily installed with out the use of any special tools. They shall be installed in a 2-1/8” face bore and a 1” hole in the edge of the door. Knobs and roses shall be heavy cold forged reinforced.

Outside knob on keyed locksets shall be removable only when the designated key is in the cylinder.

Locksets shall have the capability of accepting 6 or 7-pin standard component cylinder, interchangeable core and security cylinders to provide expansion capacity for large masterkey systems.

Latchbolts shall be stainless steel and have a standard 1/2” throw; 5/8” and 3/4” throw are available as required.

Locksets shall carry a 1-year mechanical warranty.

Locksets shall comply with the following certification: UL up to and including 3 hours fire rating ANSI A156.2 series 4000 Grade 1 ANSI A115.2 preparation
